

Disciplina: Meio ambiente, extrativismo e desenvolvimento

Professor: Bruno Milanez

Ementa

Avançar o conhecimento e entendimento sobre conceitos, perspectivas e teorias que relacionam desenvolvimento, uso de recursos naturais e globalização; discutindo a realidade Latino Americana e, particularmente, a brasileira.

Objetivos

Após participar deste curso, os alunos deverão ser capazes de:

- Descrever e avaliar diferentes conceitos, perspectivas e teorias relacionadas à noção de desenvolvimento;
- Avaliar, a partir de várias perspectivas, as contribuições do comércio internacional e das atividades extrativas, para o desenvolvimento dos países;
- Descrever e analisar, utilizando o conceito de Redes Globais de Produção, como se comportam as principais redes baseadas em recursos naturais e como contribuem para o desenvolvimento das localidades onde se inserem

Avaliação

Para cada aula os alunos deverão apresentar, por escrito, um resumo e análise de um dos textos indicados na bibliografia bem como fazer uma pequena apresentação oral, que servirá como base das discussões em sala de aula.

Unidade 1: Modelos contemporâneos de desenvolvimento

Aula 1: Apresentação e debate inicial

Aula 2: O neoliberalismo
